See what you've been missing. Mitsubishi is taking color to a new level with x.v.Color<sup>™</sup> support and its exclusive 6-Color Processor<sup>™</sup>. x.v.Color is the new standard for HDTV and it enables 80% more color than standard HDTV! Mitsubishi's 6-Color Processor<sup>™</sup> produces images with six different colors instead of the traditional three to display a wider range of colors, brighter colors and whiter whites. Additional color features such as Color 4D Noise Reduction, PerfectColor<sup>™</sup> and PerfecTint<sup>™</sup> allow for additional advanced color processing and adjustment. The result is breathtaking realism with vivid, yet natural Color Without Compromise.

See how we measure up. Mitsubishi's SuperSlim design provides more picture in less space with an incredibly thin frame and lightweight construction. This year even the 73″ DLP® HDTV gets a thin frame and a dramatically thinner cabinet so you can enjoy the maximum picture in minimum space. These 734 Series 57″, 65″ and 73″ 1080p DLP® HDTVs also feature Mitsubishi's unique TurboLight180™ lamp system, Plush1080p® Processing and Dark Detailer™ for both unsurpassed detail in over two million pixels and for bright, vibrant images.

Immerse yourself in the details. Combine the clarity of 1080p and our SuperSlim design to sit closer than ever before. One front and three rear HDMl™ 1.3 inputs plus three component inputs provide maximum HD connectivity. Mitsubishi's Easy Connect™ along with NetCommand® make set-up and single remote operation of all your AV components so easy. Additionally, a USB input for up to 5 Mega Pixel pictures connects you to large screen digital photo viewing.
